In the Claims

Pursuant to Examiner's claims rejections under 35 U.S.C. 102 and 103, Applicant hereby submits amended claims, including
5 a complete listing of all claims in the application with the status of each claim in parentheses.

Claims 1-14 (canceled).

10 15. (currently amended) Apparatus for attaching auxiliary eyeglasses to conventional eyeglasses comprising: magnetic material on said auxiliary eyeglasses; said magnetic material capable of fitting solely below and mating with magnetic material on said conventional eyeglasses, whereby said auxiliary
15 eyeglasses are capable of being removably secured to conventional eyeglasses.

16. (previously submitted) Apparatus according to claim 15 including appendages on said conventional eyeglasses; said
20 magnetic material on said auxiliary eyeglasses mounted on said appendages.

17. (previously submitted) Apparatus according to claim 16 including temple extensions on said conventional eyeglasses;

said magnetic material on said conventional eyeglasses being on said temple extensions.

18. (previously submitted) Apparatus according to claim
5 17 including sockets on said appendages; said magnetic material being mounted in said sockets on said appendages.

19. (previously submitted) Apparatus according to claim
18 including sockets on said temple extensions; said magnetic
10 material being mounted in said sockets on said temple extensions.

20. (previously submitted) Apparatus according to claim
19 in which said sockets on said appendages are cylindrical
15 sockets.

21. (previously submitted) Apparatus according to claim
20 in which said sockets on said temple extensions are
cylindrical sockets.

20

22. (previously submitted) Apparatus according to claim
21 in which said magnetic material on said appendages is a magnet mounted in each cylindrical socket.

23. (previously submitted) Apparatus according to claim 22 in which said magnetic material mounted on said temple extensions is a magnet mounted in each cylindrical socket.

5 24. (currently amended) Apparatus for attaching auxiliary eyeglasses to conventional eyeglasses comprising: temple extensions on said conventional eyeglasses having a first mating surface; appendages on said auxiliary eyeglasses having a second mating surface; and, said second mating surface capable of being
10 secured solely below said first mating surface by magnetic material whereby said auxiliary eyeglasses are capable of being removably secured to said conventional eyeglasses.

15 25. (currently amended) Apparatus for attaching auxiliary eyeglasses to conventional eyeglasses comprising: temple extensions on said conventional eyeglasses having first mating surfaces; appendages on said auxiliary eyeglasses having second mating surfaces; said second mating surfaces capable of being mounted solely below said first mating surfaces by magnetic
20 attraction whereby said auxiliary eyeglasses are capable of being removable secured to said conventional eyeglasses.

26. (currently amended) A method of attaching auxiliary eyeglasses to conventional eyeglasses comprising: providing

magnetic material on said auxiliary eyeglasses that is capable of fitting solely below and mating with magnetic material on said conventional eyeglasses; whereby said auxiliary eyeglasses are capable of being removably secured to said conventional
5 eyeglasses.

27. (new) Apparatus for attaching auxiliary eyeglasses to conventional eyeglasses comprising: temple extensions on said conventional eyeglasses having first sockets; appendages on said
10 auxiliary eyeglasses having second sockets; magnetic material on either said conventional eyeglasses or said auxiliary eyeglasses capable of mounting said second socket below said first socket whereby said auxiliary eyeglasses are capable of being removably secured to said conventional eyeglasses.

15

28. (new) Apparatus for attaching auxiliary eyeglasses to conventional eyeglasses comprising: temple extensions on said conventional eyeglasses having first sockets; appendages on said auxiliary eyeglasses having second sockets; said second sockets
20 capable of being mounted below said first socket by magnetic attraction of magnetic material on at least one of said conventional eyeglasses or auxiliary eyeglasses whereby said auxiliary eyeglasses are capable of being removably secured to said conventional eyeglasses.
